- **Instant payment**
Extremely helpful in cases of emergency situations where governments need to distribute disbursements immediately.
- **Streamline processes**
Unlike older, outdated payment systems like cheques, prepaid solutions reduce labour-intensive processes through a streamlined workflow.
- **Custom branding**
Easily customize solutions to meet your payment requirements.

THE CASE FOR

Prepaid Public Sector Solutions

Prepaid Public Sector Solutions

- Secure the distribution of funds
- Streamline operations
- Decrease paperwork
- Enforce spending policies
- Dramatically reduce costs

Public sector organizations, worldwide, such as Federal and Local governments, healthcare facilities, educational institutions, utilities, and transit organizations are consistently seeking to improve efficiencies, reduce costs, and enhance the transparency of payment processes. Prepaid debit cards provide an effective way to reduce these cost inefficiencies, while streamlining business processes for payments related to internal administration and the disbursement of public benefits.

For all governments, a significant proportion of total operational expenses can be associated with employee travel, and the purchase of goods and services. These types of business-to-business payment transactions require exceptional data management and reporting tools to facilitate tracking, reconciliation, and the monitoring of overall spending against budgets.

Prepaid debit card solutions provide cost-effective and simple methods to administer such transactions, especially in environments where charge cards or cheques are not viable options.

Federal, State and Local governments also make a large amount of entitlement or grant payments to constituents in the form of public benefits such as social security, Veterans benefits, child support, unemployment insurance, and disaster relief assistance.

Government-to-consumer payments, which were traditionally paid in the form of checks or vouchers, are now being dispersed in the form of prepaid debit card solutions, as part of a trend to reduce costs and streamline the distribution of benefits.

In addition, governments are utilizing prepaid debit card solutions to distribute other types of government payments:

- Commercial gifts
- Employee incentives and recognition awards
- Employee payroll and salaries
- Pensions

Prepaid Debit Visa Public Sector Solutions are highlighted by the following categories:

Prepaid Government Commercial Card Solutions— Prepaid debit applications designed for business travel, cash management, and organizational expenses.

Prepaid Government Benefits Card Solutions— Prepaid debit applications designed for distribution of government benefits including pensions and social security; public assistance programs such as Child Support, Unemployment Insurance, Temporary Assistance for Needy Families (TANF); and emergency assistance programs for disaster relief, etc.

Prepaid Paycard Solutions— Prepaid debit applications designed for employee salaries and compensation.

Prepaid Commercial Incentive Solutions— Prepaid debit applications designed for payment of employee incentives, rewards, and bonuses.

Prepaid Public Sector Solutions

- Secure the distribution of funds
- Streamline operations
- Decrease paperwork
- Enforce spending policies
- Dramatically reduce costs

A Powerful Solution for Employee Travel and Cash Management

The Prepaid Government Commercial Card allows government agencies to gain operational efficiencies by replacing paper-based payments, and provides a valuable benefit to employees. Designed for multi-purpose travel and cash management needs incurred by government employees, the card is simple to administer and cost-effective. Procurement officials can load funds on to prepaid debit cards in real-time and spend less time on paperwork.

Program coordinators can maintain control of employee travel expenses by pre-setting spending limits by day, week, or total budget, and applying merchant category restrictions. In addition, program coordinators can realize increased productivity by streamlining the procure-to-pay cycle required to obtain the goods and services needed to get work done.

Employees can use the prepaid debit card at millions of merchant and ATM locations. The funds are directly applied to their cards, and they can benefit from enhanced security, convenience, and control. The prepaid debit card also limits the need to submit expense reports and vouchers for disbursements and reduces paperwork.

A Smarter Way to Pay!

TruCash offers a reloadable prepaid card that your employees can use everywhere Visa® is accepted. Easily load and reload money onto the card every week to pay your workers.

Why Choose Prepaid?

For Agencies

- **Save Money.**
